PROFESSIONAL SUMMARY

Data Analyst and BI Engineer with 3+ years of hands-on experience delivering SQL, Python ETL pipelines, and Tableau dashboards at scale — including 15 production dashboards for DBS Bank and telecom KPI automation at Samsung India Electronics. Recognised with the Samsung Go-Smart Award. Holds a 9.69/10 GPA (1st Rank) in Engineering and is currently pursuing M.Sc. Digital Engineering at Otto-von-Guericke-University Magdeburg. Specialises in turning messy, multi-source data into reliable BI outputs that business teams actually use.

WORK EXPERIENCE

Data Analyst — DBS Bank | **Scatterpie Analytics (Consulting)** *Mumbai, India · Sep 2025 – Mar 2026*

- Designed and delivered 15 Tableau dashboards tracking banking KPIs across 3 business teams at DBS Bank, used daily by analysts and stakeholders for operational decision-making.
- Built and optimised Python (Pandas, NumPy) ETL pipelines integrating data from databases, APIs, and CSV/JSON sources into centralised, reporting-ready datasets.
- Optimised SQL queries and data models, reducing dashboard load times and improving data availability for analysts.
- Implemented end-to-end data validation and quality checks, ensuring high accuracy and consistency across all analytics outputs.
- Applied Scikit-learn anomaly detection techniques to flag irregularities in banking data, improving proactive monitoring.
- Automated recurring reporting workflows in Python, cutting manual reporting effort and reducing turnaround time.

Executive – Tools & Automation Support | **Samsung India Electronics** *Mumbai, India · Jun 2023 – Jul 2025*

- Built 10 Tableau dashboards using SQL for data cleaning and transformation, replacing manual Excel workflows and saving 5+ hours per week across reporting teams.
- Engineered SQL views and data models supporting seamless BI data integration and faster analyst access.
- Performed data cleaning, transformation, and validation in Python for 4G/5G network KPI datasets (sleeping cells, call drops, network availability).
- Automated recurring operational workflows using Python and Bash/Linux, reducing manual intervention across multiple teams.
- Co-recipient of the Samsung Go-Smart Award (Jun 2024) for team-level contribution to analytics automation.
- Collaborated in Agile (JIRA, Confluence) environments to deliver scalable, production-ready analytics solutions.

Graduate Engineer Trainee – Technical Support Group | **Samsung India Electronics**

Mumbai, India · Jun 2022 – May 2023

- Supported LTE/5G RAN network deployment across 500+ sites, contributing to improved network availability and rollout efficiency.
 - Analysed network logs (MAC, ECCB, PCAP) using SecureCRT and WinSCP to identify root causes and optimise performance.
 - Developed and maintained Pan-India KPI dashboards monitoring call drops, sleeping cells, and network performance metrics.
 - Executed shell scripting and EMS-based configurations to streamline network parameter updates.
-

EDUCATION

M.Sc. Digital Engineering (Computer Science) | **Otto-von-Guericke-University Magdeburg**

Saxony-Anhalt, Germany · Apr 2026 – Present

Relevant focus areas: Data Engineering, Machine Learning, Distributed Systems, Computer Science fundamentals.

B.E. Electronics & Telecommunication Engineering | **Rajiv Gandhi Institute of Technology, University of Mumbai**

Mumbai, India · May 2022

GPA: 9.69 / 10.0 — 1st Rank in EXTC Department

TECHNICAL SKILLS

Languages & Scripting: SQL (query optimisation, joins, indexing), Python (Pandas, NumPy, Scikit-learn), Bash / Shell

Data Engineering & ETL: Pipeline development, data integration (APIs, CSV, JSON), data validation & quality checks, data modelling

BI & Visualisation: Tableau (Desktop, Server, Prep, RLS, administration), Power BI (DAX, RLS), Advanced Excel

Databases: Microsoft SQL Server (views, stored procedures, performance tuning, BI extraction)

Cloud: AWS – EC2, S3, IAM, RDS, Lambda

ML & AI: Supervised & Unsupervised Learning, Regression, Classification, Random Forest, SVM, PCA, anomaly detection

Tools & Platforms: JIRA, Confluence, SecureCRT, WinSCP, FileZilla, Linux

Methodologies: Agile / Scrum, KPI Analysis, Hypothesis Testing, EDA, Statistical Analysis

Languages: English (C1 — Professional), German (A1 — Beginner)

PUBLICATIONS

Sakshi M., et al. "Real-Time Hand Gesture Recognition using LSTM Model and Conversion into Speech." International Journal of Innovative Research in Technology (IJIRT), vol. 8(10), 2022, pp. 120–124.

KEY PROJECT

Real-Time Hand Gesture Recognition using LSTM & Speech Conversion | Jul 2021 – May 2022 · Published in IJIRT

- Developed a vision-based system translating sign language gestures into speech for hearing- and speech-impaired users.
 - Built multi-layer LSTM model using Mediapipe Holistic and OpenCV; achieved 80% categorical accuracy on gesture classification.
 - Integrated Google Text-to-Speech (gTTS) for real-time audio output; evaluated via confusion matrices and iterative tuning.
-

CERTIFICATIONS

Tableau Desktop Foundations — Tableau

Jun 2025

Data Visualisation with Tableau Specialisation — Coursera

Apr 2024

Google Data Analytics Specialisation — Coursera / Google

Mar 2024

AWS Cloud Technical Essentials — Coursera / AWS

Jul 2024

ACHIEVEMENTS & ACTIVITIES

- Samsung Go-Smart Award (Jun 2024) — team recognition for contribution to analytics automation at Samsung India Electronics.
- 1st Rank, EXTC Department — University of Mumbai, B.E. (GPA: 9.69/10).
- Technical Secretary, IETE Student Chapter (2021–22) — led technical events for a 15-member committee.
